

SHREYA HEGDE

shreyahegde93@gmail.com | 8105978828 | Bangalore, India

 LinkedIn: <https://www.linkedin.com/in/shreya-hh/>

PROFESSIONAL SUMMARY

Frontend Developer with over 8 years of experience building scalable, high-performance web applications using React.js, JavaScript (ES6+), and modern UI frameworks. Strong background in building SaaS products, biometric access control systems, workforce management applications, and digital signage platforms.

Proven experience in integrating secure APIs using JWT-based authentication, implementing AI-powered chatbot solutions, and delivering responsive, accessible user interfaces. Strong focus on performance optimization, scalability, and seamless user experience in Agile environments.

TECHNICAL SKILLS

Frontend Technologies: React.js, Hooks, JavaScript (ES6+), Redux, Context API, HTML5, CSS3

UI & Design Tools: Material UI, Tailwind CSS, Bootstrap, SASS, LESS, Adobe XD, Figma

Tools & Platforms: Git (version control), Postman, Swagger, REST APIs

Core Strengths: Performance Optimization, Responsive UI Development, Cross-Browser Compatibility, Component Reusability, Agile/Scrum

Additional Expertise: JWT-based Authentication, AI Chatbot Integration (Gloria AI), Responsive Email Template, React Testing Library, Accessibility (WCAG), AI Tools (Claude.ai, ChatGPT, Copilot)

PROFESSIONAL EXPERIENCE

ZKTeco Biometric R&D – Bangalore | Frontend Engineer

Oct 2020 – Present

- Developed and scaled Cielo365, a cloud-based access control platform managing 10K+ users and biometric devices across multiple locations
- Built modular and reusable UI components using React.js, Redux, and Context API, improving development efficiency by 30%
- Designed User Management & Device Management dashboards for monitoring
- Implemented JWT-based authentication for secure API communication
- Integrated AI chatbot (Gloria) to assist users with navigation and reduce support dependency
- Applied accessibility best practices (WCAG) to improve usability and inclusivity
- Optimized application performance using lazy loading, code splitting, and memoization, reducing load time by 40%
- Collaborated with backend teams for seamless REST API integration
- Participated in code reviews, ensuring scalable and maintainable code quality

Resolve Biz Apps & Services – Bangalore | Front End Developer

May 2018 – Oct 2020

- Developed responsive web applications using JavaScript, HTML5, CSS3, improving mobile usability by 40%
- Built scalable UI architecture using Bootstrap and modern JavaScript practices
- Integrated REST APIs and optimized data handling for better responsiveness
- Collaborated with UI/UX teams to convert wireframes into production-ready interfaces
- Ensured cross-browser compatibility across desktop and mobile platforms
- Worked in Agile environment with cross-functional teams

Socioactiv Brand Solutions – Bangalore | Web Developer

May 2017 – May 2018

- Developed responsive internal web applications, improving usability across devices
- Resolved cross-browser issues, improving UI consistency by 30%
- Converted UI designs from Adobe Photoshop into pixel-perfect HTML/CSS

KEY PROJECTS

Cielo365 – Cloud-Based Access Control Platform (Enterprise SaaS)

 <https://cielo365.com/>

- Built a cloud-based access control system to manage users, biometric devices, and facility access across multiple locations enabling multi-factor authentication including face recognition, fingerprint, palm & card.
- Developed modules for user management, device management, and access control policies.
- Integrated Gloria AI chatbot to assist users with navigation and reduce support dependency.
- Improved application performance using lazy loading, code splitting, memoization, and rendering optimizations, reducing page load time by 40%.

Digimax – Smart Digital Signage Platform

 <https://zkdigimax.in/>

- Developed a digital signage platform for managing and delivering dynamic visual content across multiple displays.
- Built an intuitive Content Management System (CMS) for scheduling and managing media content.
- Designed responsive UI components for seamless cross-device experience contributing to scalable frontend architecture for high-resolution displays.

BioTime Cloud – Time & Attendance Management System

 <https://biotimecloud.me/>

- Built a cloud-based workforce management system for tracking attendance across distributed devices and networks.
- Developed real-time admin dashboards with insights on attendance, work patterns, and incidents.
- Simplified navigation by providing step-by-step assistance for complex workflows.

EDUCATION

Bachelor of Engineering in Computer Science - SDM Institute of Technology Ujire, Mangalore (2011–2015)

Pre-University Course (PUC) - SDM Pre University College Ujire, Mangalore (2009–2011)

Advanced in Software Programming - Internship - RiiiT Finishing School, Mysore (2016)
